Columbarium Niches

Concrete Single Niche Size

Granite Niche Sizes  
are Custom

Dakota Granite columbariums are designed with a focus on craftsmanship and aesthetics. Beauty, security and versatility are interwoven in the creation of above-ground memorials built to accommodate individuals, families and community cremains.

As a builder of fine memorials since 1925, Dakota Granite continues our tradition of carefully inspecting our quality at every point of creation. Each columbarium is pre-assembled by our third and fourth generation stone craftsmen who build each unit as if it were their own family memorial.

Pre-assembly also assures that each columbarium, when shipped, will meet the tightest industry specifications.

While we have a palette of beautiful designs, we are proud to work with our authorized memorialists throughout the country to help construct custom buildings designed to suit personal needs and tastes.

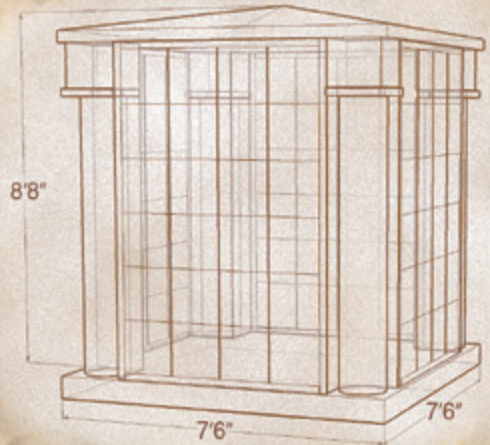

Allow us to help your families, churches, cemeteries and communities rich legacy live on through a Dakota Granite family columbarium.
